RANUNCULUS
"CLAREMONT" SUPER HYBRID No. 5
(Re-selected Strain)

STINTON & SON
CLAREMONT NURSERIES - GEELONG
VICTORIA, AUSTRALIA

New Ranunculus

"Claremont" Super Hybrids No. 5

(In Brilliant Mixture)

*(Award of Merit, Nurserymen and
Seedsmen's Association of Victoria)*

THE Committee of Inspection, which recommended the granting of this Certificate of Merit, stated: "We consider the new strain of Ranunculus, known as the 'Claremont' Super Hybrids, to be the best we have yet seen for constitution of plant, harmony of colour, form and size. All inferior quality and poor colouring have been carefully eliminated."

This strain of Ranunculus stands alone. It has a range of colour, size of flower, robustness of constitution and long-flowering qualities hitherto unknown, and it is now universally recognised as the finest strain extant and has a world-wide sale. Regular shipments are supplied to Great Britain, America, and European countries, including even Holland, the recognised hub of the Bulb Markets of the world. The strain was evolved at "Claremont" by Stinton, and immediately received the Award of Merit of the Nurserymen and Seedsmen's Association of Victoria. Many growers have since taken this strain for fusion with lines of their own, which is undoubtedly proved by the percentage of blooms of distinct No. 5 type in the various strains at present on the market.

REMEMBER! Stinton was the originator of "Claremont" Super Hybrid No. 5 and is continually improving this famous strain of Ranunculus. The strain has been still further improved this season and now embraces the finest flowers only.

Per 100, 15/-	Per 50, 8/-	Per 25, 4/6
Per 500, 60/-	Per 1000, 100/-	

In addition to the above mixed lines, we can this season offer our Ranunculus No. 5 in the following mixtures of separate shades:—

Ranunculus

"Claremont" Super Hybrids No. 5

MIXTURE No. 1.

This is a mixture of very brilliant Red shades. It is most useful for decorative purposes in the garden, and will yield flowers of wonderful size. For brilliant shades and long flowering propensities this mixture of Red shades cannot be excelled.

Per 100, 12/- Per 50, 6/6 Per 25, 3/6 Per 12, 2/-

MIXTURE No. 2.

This is an entirely new range of colours, which has been separated from our No. 5 Mixture. It comprises all bright Terra Cotta, Brick Red and Apricot shades. In our nurseries it has proved itself to be the hardiest and longest flowering type of Ranunculus we have yet known. The flowers are not adversely affected by rough weather nor hot days, and its most remarkable feature is that it will flower long after the other strains of Ranunculus have been finished up by adverse weather conditions. We have every confidence in recommending it both for decorative purposes in the garden and for exhibition purposes. Its immense flowers and long stems give it a definite advantage over all other lines of Ranunculus we have yet offered.

Per 100, 20/- Per 50, 10/6 Per 25, 5/6 Per 12, 3/-

MIXTURE No. 3.

This is an assortment of mostly Rose Pink shades, which also comprise Light Pinks, down to almost a Rosy Cerise. We have been for many years trying to select this line of Rose Pink Ranunculus, and we are pleased to say we have now been able to bring it up to a sufficiently high standard for it to be offered for sale. It is very floriferous and yields nice large flowers, but it is more sensitive of hard weather conditions when in flower than any of the other varieties which we offer. It is, therefore, recommended that it be planted in a position which will not be too open to hot winds and hard, drying conditions. It yields flowers of immense size, which are fully up to exhibition standard, and in addition to this it is a most attractive mixture for indoor decoration.

Per 100, 20/- Per 50, 10/6 Per 25, 5/6 Per 12, 3/-

MIXTURE No. 4.

This mixture comprises bright Yellow shades with an inter-mixture of those flaked varieties as depicted on our colour block. It makes a very brilliant effect in the garden and is free flowering. Flowers fully up to exhibition size are very freely borne.

Per 100, 12/- Per 50, 6/6 Per 25, 3/6 Per 12, 2/-

In order to convey to our clients some idea of the various shadings in these lines which we offer as separate colour strains, we have numbered the flowers on our colour block, and upon reference to that it will be seen the exact shadings which comprise these lines. On account of these Ranunculus having been raised from seed it is almost impossible to eliminate a few foreign colours being in the mixture.

Whilst the plants are all "rogued" in the young seed beds, there are always a few which fail to flower in the young first year, and are therefore beyond our control. This is a very small percentage, however, and we feel sure that no unsatisfactory results will be obtained.

Anemone, Coronaria, "Scarlet Emperor"

A wonderful new Anemone of the Coronaria type. The flowers are of immense size and great substance, and are borne on long, clean stems reaching as far as two feet above the foliage. This new strain has now been re-selected and much improved, and now yields flowers up to 6½ inches in diameter. For decorative purposes, either in the garden or in the home, we know of nothing to equal this Anemone.

Per 100, 15/= Per 50, 8/= Per 25, 4/6

St. Brigid, "Claremont" Super Hybrids, Mixed Colours

In this superior strain of Anemone will now be found all the finest colours and largest flowers known to cultivation, the colourings ranging from pure White, through Rose Pink, Mauves, Blues, down to very brilliant Scarlets and on to deep Maroon. Invaluable alike for garden decoration or cut flower purposes.

Per 100, 12/= Per 50, 6/6 Per 25, 3/6
Orders of 500 and over, 10/= per 100.

St. Brigid, "Claremont," Vivid Scarlet

This variety of St. Brigid Anemone is very robust and very hardy. It bears enormous flowers of a very brilliant Scarlet and has a very long flowering period. For a very brilliant effect in the garden this Anemone stands without a peer.

Per 100, 15/= Per 50, 8/= Per 25, 4/6

"Claremont" Anemone & Ranunculus Seed

As many of our Clients have expressed the wish to obtain seed of our re-selected lines of "Claremont" Anemones and Ranunculus, we have pleasure in offering these lines, as under. Owing to the immense amount of "roguing" necessary in the seed beds of those lines of Ranunculus which we offer as separate colours, we have not offered these lines in the seed, but the lines of seed we offer in our mixtures can be relied upon to yield faithful results, which will be quite equal to those obtained from our bulbs.

Although it is not an easy matter to raise successfully Anemone and Ranunculus seed, it is easy to accomplish if the right conditions prevail, and it is to those clients who do not mind the extra time which is incurred in waiting for flowering size bulbs to whom we offer our lines of seed.

Anemone, Coronaria, "Scarlet Emperor" ..	1/6 per packet
Anemone, St. Brigid, "Claremont" Re-selected Strain ..	2/6 "
Ranunculus, "Claremont" Super-Hybrids, No. 5, in Brilliant Mixture	2/6 "

Iris, "Imperator"

A new Hybrid Iris closely resembling the Spanish type, although of different origin. "Imperator" differs in that it has larger flowers, of greater substance, and blooms a fortnight earlier. The flower standard is Lavender Purple; falls, large and broad, Azure Blue, with a brilliant Yellow blotch. Strong grower. Height, 27 inches.

Extra Large Bulbs: Per 100, 25/= Per 12, 3/6
